Api instructions
from group C to group D

1)

http://192.168.0.96:6060/get/Token

This api requires one argument: group_id
The group id is: C133

The api will return a Json that contains the value of the Token Id.
You will need to use this token ID for the next step.

2)

http://192.168.0.96:6060/get/Json

This api requires one argument: token_id
The token id is the value you received in step 1.

The api will return a Json with one single column.
This column contains the mean value of the total cases of Corona in the following countries: The Netherlands, Spain, Mexico, Brazil, Iran.
